Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Species I in the reply filed on 11/26/2004 is acknowledged.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 4-11 and 13 rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Marcade-5,683,449.

As to claims 1-2 and 4-11, Marcade (Fig. 2, for example; col. 13, lines 53-57; col. 18, lines 47-54) discloses bifurcated stent-graft having stents 154 of nitinol, graft 110/112/116, barbs/hooks 156 in caudal direction. Marcade (col. 13, lines 53-57) teaches using sutures (which usually extend through two stent-graft components to secure them together) or barbs to secure two graft-stent components together. Because the barbs are sharp and long while the graft layers are thin, inherently, the barbs will extend through graft layers to strongly secure two stent-graft components together. Alternatively, it would have been obvious to one of ordinary skill in the art at the time of the invention to extend the barbs through both stent-graft components to strongly secure both the stent-graft components together.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3, 12, 14-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Marcade-5,683,449.

Marcade discloses substantially the claimed invention, except for the fuzzy tufts of yarn at a junction between two stent-graft components, a biocompatible elastomer coating on the graft(s) and a weave pattern of the graft(s) to provide strength. However, these claimed features are well known in the art and it would have been obvious to one of ordinary skill in the art to modify Marcade device to have the claimed features so as to make Marcade device available to other common uses of the device.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vy Q. Bui whose telephone number is 571-272-4692. The examiner can normally be reached on Monday-Tuesday and Thursday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anhtuan T Nguyen can be reached on 571-272-4963. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
